Version number	4

Module aims

This module aims at imparting knowledge regarding preparation of basic financial statements, analysis of financial statement and the fundamentals of finance. The module will also discuss how national and international companies report their financial information and basic structure of the financial markets which will allow you to demonstrate good understanding of the environment under which those markets operate.

Module Learning Outcomes - at the end of this module, students will be able to:

1	Critically analyse the nature of financial accounting, the users of accounting information, and the conceptual framework of accounting.
2	Applying relevant academic literature, present a critical discussion on the accounting cycle and the preparation of financial statements.
3	Critically analyse and interpret financial figures including cash flows.

4	Critically appraise the conceptual frameworks of financial reporting for companies for evaluating international corporate performance.
5	Critically examine the principles of finance and the structure of national and international financial markets.

Assessment

Indicative Assessment Tasks:

This section outlines the type of assessment task the student will be expected to complete as part of the module. More details will be made available in the relevant academic year module handbook.

Assessment 1: Written theoretical assignment covering the conceptual framework, recording transactions and preparation of financial statements (2000 words)

Assessment 2: Present a written assignment critically analysing the financial performance over an identified period of a UK FTSE350 company highlighting the profitability, liquidity, leverage, and performance of their shares in the financial market. (2,500 words)

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)
1	1 and 2	Written Assignment	50
2	3, 4 and 5	Written Assignment	50

Derogations

None

Learning and Teaching Strategies

The learning and teaching strategy will consist of formal lectures to present theory, principles and practices which will form the foundation of the learning outcomes. Students will be encouraged to interact and contribute to classroom learning as a means of developing critical skills, and to strengthen their knowledge and understanding of theory to practice. Lectures will be structured to encourage individual and group activities using real world case studies and live business examples enabling students to develop their collaborative, decision making, judging and evaluating skills, as well as key transferable employability skills. In addition, students will be encouraged to undertake self-directed study and further research on their chose area of study, as well as related topics, to acquire additional perspectives which will provide them with a greater understanding of the business topics within organisations and the wider environment.
