

Module specification

When printed this becomes an uncontrolled document. Please access the Module Directory for the most up to date version by clicking on the following link: <u>Module directory</u>

Module Code	ODP402
Module Title	Introduction to Perioperative Clinical Skills
Level	4
Credit value	20
Faculty	Faculty of Social and Life Sciences
HECoS Code	100273
Cost Code	AOD

Programmes in which module to be offered

Programme title	Is the module core or option for this	
	programme	
BSc (Hons) Operating Department Practice	Core	

Pre-requisites

None

Breakdown of module hours

Learning and teaching hours	10 hrs
Placement tutor support	20 hrs
Supervised learning e.g. practical classes, workshops	0 hrs
Project supervision (level 6 projects and dissertation modules only)	0 hrs
Total active learning and teaching hours	30 hrs
Placement / work based learning	715 hrs
Guided independent study	0 hrs
Module duration (total hours)	745 hrs

For office use only	
Initial approval date	April 22
With effect from date	September 22
Date and details of	August 2024 – updated placement hours with effect from Sept
revision	2024

For office use only	
Version number	2

Module aims

To introduce students to the clinical skills associated with perioperative practice, encompassing the areas of anaesthetics, surgery and post-anaesthetic care, with emphasis on evidence-based clinical skills.

Module Learning Outcomes - at the end of this module, students will be able to:

1	Demonstrate development in technical and non-technical skills associated with safe and effective perioperative practice.
2	Demonstrate the care values required for an allied health professional.
3	Demonstrate the behaviours and attributes required for an allied health professional.
4	Perform accurate numeracy calculations.
5	Demonstrate an ability to reflect on practice, experiences, and learning opportunities.

Assessment

Indicative Assessment Tasks:

This section outlines the type of assessment task the student will be expected to complete as part of the module. More details will be made available in the relevant academic year module handbook.

Practical and professional skills assessment within the placement will be evidenced in the Placement Education Handbook which identifies learning needs, resources used and evidence provided of the student's achievement in meeting the learning outcomes.

The other area of assessment will include a numeracy calculations examination, in relation to drawing up and administering accurate drug dosages. This examination method will be online using the Safe Medicate platform. A score of 100% will be required for this numeracy examination.

Students will be expected to demonstrate that they understand the process and importance of reflection on scenarios in the clinical environment. As part of the placement documentation, students will be required to complete a series of reflections based on their experiences.

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)
1	4	Examination	Pass/Refer
2	1, 2, 3, 5	Practical	100

Derogations

Students are permitted a maximum of two attempts and must achieve a minimum mark of 40% or Pass in each element to pass the module overall.

All placement outcomes must be passed with each placement.

Deferral is not permitted during a placement module when there is a likelihood of a refer predicted by both placement educator and university tutor and there is an absence of extenuating circumstances permitted.

Learning and Teaching Strategies

Students will use self-directed study and independent learning throughout their placements. They will have the opportunity to carry out experiential learning in the perioperative environment utilising modelling, observation and practice, guided by practice educator feedback, further developing their skills from placement. The practice education setting will support student-centred learning based around the development of an individual learning contract. Other learning opportunities will include reflection, tutorials, in-service training, supervision and practice-based problem-solving.

The 715 hours of placement will be provided in placement blocks throughout the duration of the year. Students will be allocated prescriptive placements which coincide with the content delivery in the "Introduction to Operating Department Practice" module.

Indicative Syllabus Outline

Students will be allocated placements during the set placement weeks of Level 4. These placements will be predominantly in the perioperative setting and will enable students to gain exposure to the roles and responsibilities of the Operating Department Practitioner.

Students will rotate between anaesthetics, surgery, and post-anaesthetic care. The focus of this year's placement will be on introducing the technical and non-technical skills associated with these areas of practice. Students will be allocated a practice educator in each area of exposure. Through modelling and observing the practice of the educator, and practising skills, the student will be offered the opportunity to hone their practice according to the underpinning knowledge gained from theoretical modules at the University. Practice educators will closely monitor the student and give feedback in various methods, informally and formally. The practice placement document contains information for both student and practice educator and opportunities to provide feedback.

The competencies contained within the practice placement document reflect the expectations of a student at this level of study. There are options for the student to demonstrate a Pass or Excellent Pass.

Students will be given sessions on how to engage in reflective practice. These sessions will help to inform students on the benefits of reflection in practice.

Indicative Bibliography:

Please note the essential reads and other indicative reading are subject to annual review and update.

Essential Reads

Hughes, S. J. & Mardell, A. (2009) Oxford handbook of perioperative practice.

Employability – the University Skills Framework

Each module and degree programme are designed to support learners as they develop their graduate skills aligned to the University Skills Framework.

Using the philosophies of the Active Learning Framework (ALF) our 10 skills are embedded within programmes complementing core academic subject knowledge and understanding. Through continuous self-assessment students own their individual skills journey and enhance their employability and career prospects.

This Module forms part of a degree programme that has been mapped against the University Skills Framework.

The Wrexham University Skills Framework Level Descriptors: An incremental and progressive approach.

Learners can use this document to identify where and how they are building skills and how they can develop examples of their success.
