## Module specification

When printed this becomes an uncontrolled document. Please access the **Module Directory** for the most up to date version by clicking on the following link: **Module directory**

Module Code	NHS60DD
Module Title	Management of Diabetes
Level	6
Credit value	20
Faculty	FSLS
HECoS Code	101338
Cost Code	GANG

## Programmes in which module to be offered

Programme title	Is the module core or option for this programme
Standalone module aligned to BSc (Hons) Community Specialist Practice for QA and assessment purposes	Option

## Pre-requisites

None

## Breakdown of module hours

Learning and teaching hours	30 hrs
Placement tutor support	0 hrs
Supervised learning e.g. practical classes, workshops	0 hrs
Project supervision (level 6 projects and dissertation modules only)	0 hrs
<b>Total active learning and teaching hours</b>	<b>30 hrs</b>
Placement / work based learning	0 hrs
Guided independent study	170 hrs
<b>Module duration (total hours)</b>	<b>200 hrs</b>

<b>For office use only</b>	
Initial approval date	October 2016
With effect from date	October 2016

For office use only	
Date and details of revision	April 2019 – APSC modification July 2024 – Approved as standalone module and realigned to BSc (Hons) CSP retrospectively from Oct 2021.
Version number	3

## Module aims

To introduce the students to the complexities of caring for the person with diabetes through the use of current theoretical perspectives, evidence based practice technological advances within the context of primary healthcare.

## Module Learning Outcomes - at the end of this module, students will be able to:

1	Critically debate the literature pertaining to the nature and diagnostic processes that exist in order to differentiate the types of diabetes.
2	Demonstrate an in depth understanding of the diabetes disease process and its' impact upon the suffering of patients within the context of primary healthcare.
3	Explore local and national resources that may be required to provide person-centred diabetic care for patients in the primary healthcare setting.
4	Critically explore current, research and theories used to guide decision making strategies with regards to Diabetes in primary healthcare and consider cultural issues that impinge upon the use of these strategies.
5	Critically appraise the use of empowerment strategies that exist in the management of Diabetes.

## Assessment

Indicative Assessment Tasks:

This section outlines the type of assessment task the student will be expected to complete as part of the module. More details will be made available in the relevant academic year module handbook.

The assessment for this module is summative in the form of a case study that explores the nature of Diabetes, evidence based strategies for managing Diabetes. The students will draw upon contemporary policy, research and theories in order to explore the experience of Diabetes for patients (3000 words).

Assessment number	Learning Outcomes to be met	Type of assessment	Weighting (%)
1	1, 2, 3, 4, 5	Coursework	100

## Derogations

---

All elements of assessment must be passed. Any work submitted which indicates unsafe practice by the student, or which breaches anonymity and/or confidentiality, will be deemed a refer grade.

## Learning and Teaching Strategies

---

A variety of teaching methods will be used including lectures, seminars, open learning materials, student presentations, debate, case studies, action learning sets, discussion and tutorials. Directed study using the library and on-line services (the University's VLE) will be promoted. There will be opportunity for shared learning with other groups of students. In clinical practice an experiential strategy, including observation, guided practice and observed independent practice, will be used to meet the module outcomes. Class time will include discussions and group work, case studies and scenarios. Students will have some shared learning with level 7 students, however there will be tutor groups and seminars to take account of the different level of study for this module.

## Indicative Syllabus Outline

---

Normal and altered physiology of the endocrine system, classifications of Diabetes, risk factors and complications. The socio-political context. Treatments, devices and evidence. Concordance, nutritional needs, podiatry, long term care and educational support services, QOF targets.

## Indicative Bibliography:

---

Please note the essential reads and other indicative reading are subject to annual review and update.

## Employability – the University Skills Framework

---

Each module and degree programme are designed to support learners as they develop their graduate skills aligned to the University Skills Framework.

Using the philosophies of the Active Learning Framework (ALF) our 10 skills are embedded within programmes complementing core academic subject knowledge and understanding. Through continuous self-assessment students own their individual skills journey and enhance their employability and career prospects.

This Module forms part of a degree programme that has been mapped against the University Skills Framework.

**The Wrexham University Skills Framework Level Descriptors: An incremental and progressive approach.**

Learners can use this document to identify where and how they are building skills and how they can develop examples of their success.
