Aims of the programme

The programme has been developed to meet the needs of practitioners who provide **housing** related support for vulnerable people. Their respective roles may be operational or strategic, commissioning or contractual, and be located within the

public, private or voluntary sector. The primary objective of the programme is to provide learners with knowledge of the context within which housing and support has been planned developed and delivered in order that they can reflect on and analyse how this impacts on supported housing practice generally and their role specifically.

The aim of the programme is to empower individuals in order that they may be able to operate more effectively in practice. This will be underpinned by a learning strategy which seeks to offer them self determination in terms of learning, and professional and personal development.

Intended learning outcomes of the programme*

FdSc Supported Housing

Knowledge and understanding: Students will be able to...

- 1. Analyse the social, economic, and legal context within which supported housing services are provided.
- 2. Identify the policy and regulatory framework within which supported housing operates and be able to analyse the implication of this for practice in a variety of settings.
- 3. Analyse the concepts and objectives of sustainability, sustainable communities and citizenship and demonstrate the role that supported housing organisations play in achieving these aims.
- 4. Demonstrate broad knowledge of relevant financial frameworks and practices and evaluate the impact of these on service delivery.
- 5. Identify and analyse the legal framework within which supported housing is practiced and be able to apply it to practical situations.
- 6. Identify the internal and external influences which impact on organisational development and apply these to practice.
- Identify the pivotal role of user involvement in services and support needs assessment planning, and demonstrate how they incorporate this value into own practice.
- 8. Have a critical awareness of the range of techniques used to ensure that service user needs are accurately identified and met and be able to apply these to specific instances.
- 9. Identify the principles of and opportunities for collaborative working and inter-

- professional working and reflect on the practical implications of this.
- 10. Demonstrate broad knowledge of techniques and strategies associated with business management principles and practices and be able to apply these to a housing context.
- 11. Analyse the way in which supported housing services are provided, managed and maintained and regulated.
- 12. Analyse the way in which supported housing is planned, financed and delivered.
- 13. Demonstrate a critical understanding of equality diversity and be able to apply this to organisational practice and use a basis for reflection on individual practice.
- 14. Demonstrate a knowledge of the essential components associated designing and implementing housing research.

(B) Intellectual skills: Students will be able to...

- Analyse and interpret a range of information and apply it to particular circumstances
- 2. Identify and describe relevant theory and use this as a basis for evaluating practice
- Communicate ideas in a professional manner which reflects the needs of differing audiences.
- 4. Draw up strategies for self management and motivation
- 5. Demonstrate the capacity for independent learning.

(C) Subject skills: Students will be able to...

- 1. Exercise personal responsibility
- 2. Identify the support needs of particular groups and analyse policy and practice responses.
- Use Work Based Learning as a means to reflect on individual development opportunities
- 4. Use Work Based Learning as a means to reflect on organisational development opportunities
- Demonstrate Basic Business Management skills appropriate to their practice:
 Risk Management, Business Planning, Marketing Skills, Change Management Skills, and Enterprise

(D) Practical, professional and employability skills: Students will be able to...

- 1. Apply knowledge gained through academic studies to working practice
- 1. Work well with individuals from different professional and organisational backgrounds showing respect for diversity and equality of opportunity.
- 2. Reflect on the principles and application of support planning.
- 3. Behave with integrity and apply ethical principles to practice.
- 4. Reflect upon their own professional development and draw up strategies to meet their continuing professional development
- 5. Identify and discuss the role that professional bodies can play in meeting these needs.

Learning outcomes for the Certificate of Higher Education in Supported Housing

(A) Knowledge and understanding: Students will be able to...

- 1. Identify the social, economic, and legal context within which supported housing services are provided
- 2. Identify the policy and regulatory framework within which supported housing operates
- 3. Be familiar with objectives of sustainability, sustainable communities and citizenship and demonstrate the role that supported housing organisations play in achieving these aims.
- 4. Demonstrate fundamental knowledge of relevant financial frameworks and practices and evaluate the impact of these on service delivery.
- 5. Identify the legal framework within which supported housing is practiced and be able to apply it to practical situations.
- Identify the pivotal role of user involvement in services and support needs assessment planning, and demonstrate how they incorporate this value into own practice.
- 7. Identify the principles of and opportunities for collaborative working and interprofessional working.
- 8. Outline the way in which supported housing services are provided, managed and maintained and regulated.
- 9. Demonstrate a basic understanding of equality diversity and be able to apply this to organisational practice and use a basis for reflection on individual practice.

(B) Intellectual skills: Students will be able to...

- 1. Interpret a range of information and apply it to particular circumstances
- 2. Identify and describe relevant theory and use this as a basis for evaluating practice
- 3. Communicate ideas in a professional manner which reflects the needs of differing audiences.
- 4. Draw up strategies for self management and motivation
- 5. Demonstrate the capacity for independent learning.

(C) Subject skills: Students will be able to...

- 1. Exercise personal responsibility
- 2. Identify the support needs of particular groups and analyse policy and practice responses.
- 3. Use Work Based Learning as a means to reflect on individual development opportunities
- 4. Use Work Based Learning as a means to reflect on organisational development opportunities
- Demonstrate Basic Business Management skills appropriate to their practice:
 Risk Management, Business Planning, Marketing Skills, Change
 Management Skills, and Enterprise

(D) Practical, professional and employability skills: Students will be able to...

- 1. Apply knowledge gained through academic studies to working practice
- 2. Work well with individuals from different professional and organisational backgrounds showing respect for diversity and equality of opportunity
- 3. Reflect on the principles and application of support planning.
- 4. Behave with integrity and apply ethical principles to practice.
- Reflect upon their own professional development and draw up strategies to meet their continuing professional development
- 6. Identify and discuss the role that professional bodies can play in meeting these needs.

Distinctive features of the programme

The programme is accredited by the Chartered Institute of Housing and meets the requirements for professional membership.

^{*}A curriculum map is appended showing how the overall programme outcomes are achieved and where skills are developed and assessed within individual modules.

The primary objective of the programme is to provide learners with knowledge of the context within which housing and support has been planned developed and delivered in order that they can reflect on and analyse how this impacts on supported housing practice generally and their role specifically.

The aim of the programme is to empower individuals in order that they may be able to operate more effectively in practice. This will be underpinned by a learning strategy which seeks to offer them self determination in terms of learning, and professional and personal development.

Learning, teaching and assessment strategies used to enable outcomes to be achieved and demonstrated

The learning and teaching strategy has been developed within Glyndŵr University's Teaching and Learning framework, the QAA¹ Subject Benchmark statement for Housing Studies(2007), The QAA Foundation Degree Qualification Benchmark (2006), the QCA² descriptors for Higher Education qualifications, the expectations of the CIH, and the Foundation Degree Sectoral Framework document(2006).

The programme team has developed a strategic approach to delivering learning and teaching which meets the needs of the student group, enables skills development, allows for the practice application of knowledge and encourages students to become reflective practitioners. The balance between class contact / formal teaching and directed study is detailed within the modules specifications. Students will apply their learning to the workplace and will be encouraged, through classroom activity and assessments, to reflect on their own practice and organisational practice in order to improve their own performance as well as giving them the knowledge and confidence to contribute towards the development of organisational performance and improvement. They will also be expected to reflect on experiences within the work place and use these as a basis for learning.

The programmes have been developed to reflect the range of different functional areas associated with the delivery of sustainable housing solutions for communities and individuals.

There is a need to ensure efficiencies in delivery and facilitate an understanding of

_

¹ Quality Assurance Agency for Higher Education

² Qualifications and Curriculum Authority

the interconnectedness of the roles involved in delivering sustainable communities. For this reason the curriculum will be delivered through range modules which are shared by all of the programmes with the addition of one programme specific module. The teaching and learning strategy combined with the assessment strategy has sought to ensure that although students maybe learning alongside students from other functional areas they are able to apply the knowledge to their specific programme of study.

Criteria for admission to the programme

The general requirement for the foundation degree is 100 UCAS points at A level or equivalent. In addition applicants must have five GCSE passes at grades A, B or C including Mathematics and English or Welsh 1st Language.

Other learning and experience may be considered for entry to the programme. A student may be allowed entry if he or she does not have the standard entry qualifications but can provide evidence of necessary knowledge and skills to successfully enter and complete the course.

Additionally

Normally, applicants must be working within a housing or regeneration setting either paid or voluntary for at least 150 hours per year and have the agreement of the organisation to support them to gain the foundation degree. All students will be interviewed as part of the admissions process. Through the interview, the team will confirm that the student's workplace or volunteer setting will allow the students to fulfil the programme requirements.

Accreditation of prior experiential learning and prior learning

The Foundation Degree Sectoral Framework anticipates that students applying for Foundation Degrees may have previous relevant qualifications or experience. The programme team will ensure they use Glyndŵr University's APEL and APL procedures in order to maximize advantage to the students who already have achieved some of the competencies and underpinning knowledge from previous study. For example, students who have completed a Glyndŵr University HNC in Housing and Sustainable Communities may claim advanced standing on the proposed FdSc Housing and Sustainable Communities with 120 credits at level 4 and the 20 Level 5 Research Methods module. Similarly, students with a Glyndŵr University HNC in Supported Housing may seek advanced standing on the FdSc Supported Housing. These claims will be subject to Glyndŵr University's regulations for Accreditation of Prior Learning Regulations (APL).

Indicators of quality

Progression statistics

Student satisfaction surveys (Internal and External)

External Examiner Reports

Methods for evaluating and improving the quality and standards of the

programme

In keeping with the policies and procedures agreed by Academic Board, the key mechanism for quality control and enhancement at programme level will be the processes and procedures associated with the annual monitoring cycle which is formalised through the production of the Annual Monitoring Report (AMR). The AMR evaluates the programme delivery drawing on feedback from students, the professional body, external examiners and employers. Specific methods used for consulting students include the completion of SPOMs, Staff Student Consultative Committees and end of year group feedback sessions The outcomes of this report are scrutinised and agreed at School Level with subsequent monitoring and review being formalised though the School Board for Science and Technology.

Particular support for learning

The team subscribe to the view that their key role is to facilitate the engagement of the learner and the enhancement and enrichment of the learning experience wherever learning takes place. The learning infrastructure and student support mechanisms support this role in the following ways.

Institute Level

At Institute level, learning support provided includes welfare services, healthcare provision and services for learners with educational support needs. These services are advertised on the web site and signposted within the Student Handbook

There is also a University commitment to ensure that learners are aware of their rights and responsibilities. This information is provided electronically through the web site. Learners who need to exercise their rights, for example to make an academic appeal, are advised and supported by the Student Guild. Likewise students who may be the subject of a disciplinary hearing are also advised by the Students Guild.

Learner representation and opportunities to evaluate institute policies and procedures is evident throughout the University, and includes student representation on the Board of Governors and Academic Board.

Learning Resources are provided centrally within the Library and these include a range of relevant books, journals and electronic resources. The University has

decided to utilise Moodle as its Virtual Learning Environment and the programme team are in the process of developing their site for students.

School Level

Students are represented at School Board and are invited to comment on any aspect of board business.

Programme Level

Students will be signposted to University services through the student handbook. The student will contribute to quality assurance and improvement in the following ways: module evaluation questionnaires; perception of programme questionnaires and representation on the staff student liaison committee and on programme boards.

On the individual level students will be supported in their learning in the following ways:

- Students will be provided with a programme handbook which details their programme of study and signposts them to University level support mechanisms, policies and regulations.
- Student academic support needs will be met in the following ways.
 - The provision of a two day programme and study skills induction.
 - Individual tutorials with academic tutors to identify individual learning needs and aspirations which will then be monitored via the Work Based learning module.
 - Tutors will use Moodle as a repository for course material and are actively engaging in developing opportunities to use Moodle to provide feedback to students, promote online discussion and promote a VLE academic community. Additionally, there will be a dedicated study skills section which developed by study skills lecturers across the university.
 - Pastoral support will be provided by a named personal tutor.
 - The Work Based learning modules are critical to the learning support for students as they will develop and support enrichment opportunities by enabling the students to exercise a degree of autonomy in their choice of learning.

- There will be a study silks induction programme at the beginning of year 1 which will be managed by the study skills lecturer attached to the Built Environment.
- The study skills tutor will be available to support and guide to students for ongoing individual and/or small group support on a self referral basis throughout the year including the summer period
- Each programme of study will have arrangements in place for a programme student representative. This representative will be invited to attend Programme Boards and School Boards.

Equality and Diversity

The design and delivery of the programme meets the requirements of the University's equality schemes and equality legislation by ensuring that there is a formal admissions procedure, applications and offers are monitored to ensure compliance with legislation and Institute policy. Progression and completion rates are also monitored.

Where students have specific needs they are encouraged to discuss them with the programme leader in order that arrangements can be put in place to meet these needs.
