Section 1 – Regulatory Details				
1.1	Awarding body	Wrexham University		
1.2	Teaching institution	Wrexham Plas Coch Campus		
1.3	Final award and programme title (Welsh and English)	BEng (Anrh) Peirianeg Awyrofod BEng (Hons) Aerospace Engineering BEng (Anrh) Peirianeg Awyrofod (gyda Blwyddyn Sylfaen) BEng (Hons) Aerospace Engineering with Foundation Year		
1.4	Exit awards and titles	BEng (Ord) Aerospace Engineering Diploma of Higher Education in Aerospace Engineering Certificate of Higher Education in Engineering		
1.5	Credit requirements	Bachelor Honours degree: 360 credits in total including a minimum of 120 credits at level 6 BEng (Ord): 300 credits in total including a minimum of 60 credits at level 6 Dip HE: 240 credits in total including a minimum of 120 credits at level 5 Cert HE: A minimum of 120 credits at level 4		
1.6	Intake points	Once yearly, September		
1.7	Mode of study	Full time		
1.8	Length of delivery	BEng (Hons) Aerospace Engineering - 3 years BEng (Hons) Aerospace Engineering with Foundation Year – 4 years		
1.9	Location of delivery	Campus based (Wrexham)		
1.10	Mode of delivery	<table><tr><td>Full time</td><td>In person</td></tr></table>	Full time	In person
Full time	In person			
1.11	Language of delivery	English		

Section 1 – Regulatory Details									
1.12	Faculty	Faculty of Arts, Computing and Engineering (FACE)							
1.13	Subject area	Engineering							
1.14	HECoS Code	BEng (Hons) Aerospace Engineering 100115							
1.15	Suitable for applicants requiring a Student Visa?	<table border="1"> <tr> <td>Full time</td> <td>In person</td> <td>Yes</td> </tr> </table>		Full time	In person	Yes			
Full time	In person	Yes							
1.16	Is DBS check required on entry?	No							
1.17	Professional, Statutory or Regulatory Body (PSRB) accreditation	The engineering programmes have been developed in line with PSRB requirements, including IMechE, IET, & RAeS. BEng (Hons) Aerospace Engineering *RAeS *Subject to accreditation 2027 RAeS - www.aerosociety.com This information is correct at the time of validation, please refer to the PSRB register for current accreditation status.							
1.18	Welsh Medium Provision	The programmes will be delivered through the medium of English. Students have the option to submit assessments in the medium of Welsh. To support Welsh Medium development, the programme includes a 20-credit Welsh for STEM module available as a short course for all engineering students.							
1.19	External reference points	QAA Subject Benchmark Statement Engineering (2023) QAA Characteristics Statements Higher Education Credit Framework CQFW PSRB Accreditation Guidelines							
1.20	Derogation to Academic Regulations	<table border="1"> <thead> <tr> <th>Regulation Clause(s) affected</th> <th>Derogation Summary</th> </tr> </thead> <tbody> <tr> <td>UG-D3</td> <td>Each element of assessment (where there is more than one assessment) requires a minimum mark of 10% below the pass mark (30% for L6).</td> </tr> <tr> <td>E10.4, UG-E5.1</td> <td> - A maximum of 30 credits can be compensated. - No compensation allowed for L5 or L6 modules. - Modules at level 4 that capture AHEP Learning outcomes must also not be compensated (Work Based Learning, Engineering Materials & Processes and Core Engineering Skills and Application). </td> </tr> </tbody> </table>		Regulation Clause(s) affected	Derogation Summary	UG-D3	Each element of assessment (where there is more than one assessment) requires a minimum mark of 10% below the pass mark (30% for L6).	E10.4, UG-E5.1	- A maximum of 30 credits can be compensated. - No compensation allowed for L5 or L6 modules. - Modules at level 4 that capture AHEP Learning outcomes must also not be compensated (Work Based Learning, Engineering Materials & Processes and Core Engineering Skills and Application).
Regulation Clause(s) affected	Derogation Summary								
UG-D3	Each element of assessment (where there is more than one assessment) requires a minimum mark of 10% below the pass mark (30% for L6).								
E10.4, UG-E5.1	- A maximum of 30 credits can be compensated. - No compensation allowed for L5 or L6 modules. - Modules at level 4 that capture AHEP Learning outcomes must also not be compensated (Work Based Learning, Engineering Materials & Processes and Core Engineering Skills and Application).								

Section 1 – Regulatory Details		
1.21	Foundation Year route	Yes (STEM Foundation Year)
1.22	Placement / Work based learning	Optional Work Placement – placements embedded within the programme, which must be completed to pass the module or programme. These may range from one day to a week or a few months and can be delivered as day release or in blocks.
1.23	Length and level of the placement	The placement will last up to 12 weeks in SEM-2 of the academic calendar through the delivery of ENG6E3 Professional Practice.
1.24	Collaborative arrangement	N/A

Section 2 – Programme Details	
2.1 Aims of The Programme	
The BEng (Hons) Aerospace Engineering programme aims to develop industry-ready graduates with strong theoretical knowledge, hands-on skills, and the ability to innovate in a fast-moving sector. Delivered full-time and aligned to AHEP-4 standards, the programme blends classroom learning with extensive laboratory-based activity to reinforce understanding and prepare students for careers in aerospace, defence, and advanced engineering. The aim of this programme is for students to be able to apply knowledge of engineering principles to problems with no immediately known solutions. This knowledge will be built up during the length of the programmes using lecturers that build up fundamental understanding of mathematics, statistics, natural sciences in an Aerospace content. Key engineering behaviours will be taught and demonstrated in order to comply with being a professional engineer. This will include, diversity, inclusivity, ethics, sustainability, team working, communication and statutory obligations (H&S). Students will gain experience using modelling techniques whilst challenging the outcomes of computation analyses to ensure correct solutions are obtained. The key aim is to provide a well-rounded, technically competent and solution driven independent learners in this important field of engineering.	

2.2 Programme Structure and Diagram, Including Delivery Schedule
In Year 1, students build a solid foundation in aerospace and mechanical engineering through modules in Engineering Mathematics, Core Engineering Skills and Application, and Fundamentals of Aerospace Engineering. Practical understanding is developed through Engineering Design and CAD, Engineering

Materials & Processes, and Practical Engineering Skills, with hands-on workshops and digital tools supporting applied learning.

In Year 2, the focus shifts towards the application of knowledge in industry-relevant contexts. Students explore Mechanical Design and Analysis, Aerospace Design and Performance, and Applied Thermofluids and Propulsion. Skills in design and digital manufacturing are developed further in Design to Manufacture (CAD/CAM). Teamworking and innovation are embedded in the Engineering Design Project, where students collaborate on complex, multi-disciplinary challenges.

In Year 3, students specialise in advanced aerospace topics such as Mechanical Modelling & Simulation, Advanced Aerodynamics & CFD, and Lightweight Structures and Composites. The Professional Practice module supports career readiness and ethical awareness. The year culminates in an individual Project, where students apply their technical and professional knowledge to a substantial research or design problem, showcasing their readiness for graduate employment or further study.

Full-time Programme Structure

Level	Module Code	Module Title	Credit Value	Core/ Option	Semester of delivery
L4	ENG4C2	Engineering Maths	20	Core	1
L4	ENG4C3	Core Engineering Skills and Application	20	Core	1
L4	ENG4C4	Fundamentals of Aerospace Engineering	20	Core	1
L4	ENG4C9	Engineering Design and CAD	20	Core	2
L4	ENG4D1	Engineering Materials & Processes	20	Core	2
L4	ENG4D4	Practical Engineering Skills	20	Core	2
L5	ENG5C1	Mechanical Design and Analysis	20	Core	1
L5	ENG5C2	Aerospace Design and Performance	20	Core	1
L5	ENG5C3	Design to Manufacture (CAD/CAM)	20	Core	2
L5	ENG5C6	Applied Thermofluids and Propulsion	20	Core	2
L5	ENG5D8	Engineering Design Project	40	Core	1 & 2
L6	ENG6C6	Mechanical Modelling & Simulation	20	Core	1
L6	ENG6C9	Advanced Aerodynamics & CFD	20	Core	1
L6	ENG6D1	Lightweight Structures and Composites	20	Core	1
L6	ENG6E3	Professional Practice	20	Core	2
L6	ENG6E4	Project	40	Core	1 & 2

2.3 Programme Learning Outcomes

The following programme learning outcomes have been fully mapped against the AHEP-4 learning outcomes for Partial CEng Accreditation.

No.	Learning Outcome	K	I	S	P	Cert HE (L4)	Dip HE (L5)	Ordinary (L6)	Honours (L6)	Optional Ref (PSRB standards)
1.1	Apply knowledge of mathematics, statistics, natural science and engineering principles to broadly-defined problems. Some of the knowledge will be informed by current developments in the subject of study.	☒	☐	☐	☐	☐	☒	☐	☐	-
1.2	Apply knowledge of mathematics, statistics, natural science and engineering principles to the solution of complex problems. Some of the knowledge will be at the forefront of the particular subject of study.	☒	☐	☐	☐	☐	☐	☒	☒	C1
2.1	Analyse broadly-defined problems reaching substantiated conclusions.	☒	☐	☐	☐	☒	☐	☐	☐	-
2.2	Analyse complex problems to reach substantiated conclusions using first principles of mathematics, statistics, natural science and engineering principles.	☒	☐	☐	☐	☐	☐	☒	☒	C2
3	Select and apply appropriate computational and analytical techniques to model complex problems, recognising the limitations of the techniques employed.	☒	☐	☐	☐	☐	☐	☒	☒	C3
4.1	Select and use technical literature and other sources of information to address broadly-defined problems.	☒	☐	☐	☐	☐	☒	☐	☐	-

No.	Learning Outcome	K	I	S	P	Cert HE (L4)	Dip HE (L5)	Ordinary (L6)	Honours (L6)	Optional Ref (PSRB standards)
4.2	Select and evaluate technical literature and other sources of information to address complex problems.	☒	☐	☐	☐	☐	☐	☒	☒	C4
5	Design solutions for complex problems that meet a combination of societal, user, business and customer needs as appropriate. This will involve consideration of applicable health & safety, diversity, inclusion, cultural, societal, environmental and commercial matters, codes of practice and industry standards.	☐	☒	☐	☐	☐	☐	☒	☒	C5
6.1	Apply a systematic approach to the solution of broadly-defined problems.	☐	☒	☐	☐	☐	☒	☐	☐	-
6.2	Apply an integrated or systems approach to the solution of complex problems.	☐	☒	☐	☐	☐	☐	☒	☒	C6
7	Evaluate the environmental and societal impact of solutions to complex problems and minimise adverse impacts.	☐	☒	☐	☐	☐	☐	☒	☒	C7
8	Identify and analyse ethical concerns and make reasoned ethical choices informed by professional codes of conduct.	☐	☒	☐	☐	☐	☐	☒	☒	C8
9	Use a risk management process to identify, evaluate and mitigate risks (the effects of uncertainty) associated with a particular project or activity.	☐	☒	☐	☐	☐	☐	☒	☒	C9
10	Adopt a holistic and proportionate approach to the mitigation of security risks.	☐	☒	☐	☐	☒	☐	☐	☐	C10

No.	Learning Outcome	K	I	S	P	Cert HE (L4)	Dip HE (L5)	Ordinary (L6)	Honours (L6)	Optional Ref (PSRB standards)
11	Adopt an inclusive approach to engineering practice and recognise the responsibilities, benefits and importance of supporting equality, diversity and inclusion.	☐	☒	☐	☐	☐	☐	☒	☒	C11
12.1	Use practical laboratory and workshop skills to investigate broadly-defined problems.	☐	☐	☒	☐	☐	☒	☐	☐	-
12.2	Use practical laboratory and workshop skills to investigate complex problems.	☐	☐	☒	☐	☐	☐	☒	☒	C12
13.1	Select and apply appropriate materials, equipment, engineering technologies and processes.	☐	☐	☒	☐	☐	☒	☐	☐	-
13.2	Select and apply appropriate materials, equipment, engineering technologies and processes, recognising their limitations.	☐	☐	☒	☐	☐	☐	☒	☒	C13
14	Discuss the role of quality management systems and continuous improvement in the context of complex problems.	☐	☐	☒	☐	☐	☐	☒	☒	C14
15	Apply knowledge of engineering management principles, commercial context, project and change management, and relevant legal matters including intellectual property rights.	☐	☐	☒	☐	☐	☐	☒	☒	C15
16	Function effectively as an individual, and as a member or leader of a team.	☐	☐	☐	☒	☐	☒	☐	☐	C16
17.1	Communicate effectively with technical and non-technical audiences.	☐	☐	☐	☒	☒	☐	☐	☐	-

No.	Learning Outcome	K	I	S	P	Cert HE (L4)	Dip HE (L5)	Ordinary (L6)	Honours (L6)	Optional Ref (PSRB standards)
17.2	Communicate effectively on complex engineering matters with technical and non-technical audiences.	☐	☐	☐	☒	☐	☐	☒	☒	C17
18	Plan and record self-learning and development as the foundation for lifelong learning/CPD.	☐	☐	☐	☒	☒	☐	☒	☒	C18
19	Plan, conduct and report on an original programme of work (Dissertation).	☒	☒	☒	☒	☐	☐	☐	☒	-

Note: K- Knowledge and understanding; I-Intellectual Skills; S-Subject Skills; P-Practical, professional and employability skills

2.4 Learning and Teaching Strategy

Key to this provision is the opportunity to work on authentic assessments that replicate as best as possible real world engineering careers. Formal examinations have been removed and replaced where possible with coursework, projects or portfolio. Inbuilt into the assessment strategies are timed assessment that may include software-based assessment, practical evaluation or viva style assessments. Assessments are designed to be innovative and inclusive and will evolve as technology develops.

The learning and teaching strategy aligns with Wrexham University's Active Learning Framework (ALF) incorporating key employability skills. It is flexible, engaging, and responsive to student diversity and professional demands. A blended approach combines on-campus sessions with virtual study activities.

Face-to-Face Learning

Students will engage in lectures, seminars, and workshops in various settings, incorporating case studies and problem-based learning. The programme is mapped to instructional models that increase laboratory-based learning, critical for reinforcing theoretical knowledge through practical application:

Model A: 100% Classroom

Model B: 50% Classroom / 50% Laboratory

Model C: 25% Classroom / 75% Laboratory

Model D: 100% Laboratory

These models promote deeper learning, research capability, and technical proficiency. Laboratory hours have been increased to allow students to apply classroom-acquired theory, reinforcing understanding and preparing them for future innovation in industry or postgraduate research.

Virtual Learning

Delivered through the VLE and Microsoft Teams, virtual learning includes asynchronous tasks (videos, quizzes, readings, virtual visits) and synchronous activities (discussions, case studies, simulations). Sessions will be recorded where appropriate.

Tutorials

Delivered both in person and online, tutorials promote active participation through individual and group engagement. They are designed to encourage critical thinking, reflective practice, and student-led learning, supporting creativity, independence, and a deeper understanding of subject knowledge and professional practice.

2.5 Assessment Strategy

The programme uses an innovative assessment strategy with no formal exams replacing them with multiple choice quizzes, coursework, practical work, and project-based assessments that mirror industry practice. This approach, combined with access to modern facilities and strong employer input, ensures graduates are well-prepared for employment or further study in the aerospace sector.

The assessment strategies are designed to be supportive and to build confidence, whilst also ensuring that students engage with core material, develop the fundamental and subject skills required for progression of undergraduate studies, and reward and incentivise students.

Assessment tasks are varied to facilitate students to evidence their learning and include portfolio, presentations, practical and oral assessment which promote authentic assessment and encourage the

2.5 Assessment Strategy

deeper learning that is a key feature of higher education. Formative feedback opportunities are embedded into each of the modules regularly and encourages students to reflect on their progress.

Feedback is provided within 15 working days of the assessment submission date and may be delivered individually or in groups, in written, verbal, or recorded formats. This ensures that students receive timely, constructive, and developmental guidance to support continuous learning and improvement.

Disclaimer
