Section 1 – Regulatory Details			
1.1	Awarding body	Wrexham University	
1.2	Teaching institution	Wrexham Plas Coch Campus	
1.3	Final award and programme title (Welsh and English)	MSc Peirianeg (Ynni Cynaliadwy) MSc Engineering (Sustainable Energy)	
1.4	Exit awards and titles	Postgraduate Diploma in Engineering (Sustainable Energy) Postgraduate Certificate in Engineering	
1.5	Credit requirements	Master of Science (MSc) requires the achievement of 120 credits taught at level 7 and 60 credits dissertation. Postgraduate Diploma (PG Dip) requires the achievement of 120 credits taught at level 7. Postgraduate Certificate (PG Cert) requires the achievement of any combination of taught modules amounting to 60 credits across any provision.	
1.6	Intake points	Full time: September and January Part time: September	
1.7	Mode of study	Full & part time	
1.8	Length of delivery	Full time – 12 months (September Intake) Full time – 18 months (January Intake) Part time – 24 months (September Intake)	
1.9	Location of delivery	Campus based (Wrexham)	
1.10	Mode of delivery	Full time	In person
		Part time	In person
1.11	Language of delivery	English	
1.12	Faculty	Faculty of Arts, Computing and Engineering (FACE)	

Section 1 – Regulatory Details				
1.13	Subject area	Engineering		
1.14	HECoS Code	MSc Engineering (Sustainable Energy) 100180		
1.15	Suitable for applicants requiring a Student Visa?	Full time	In person	Yes
		Part time	In person	No
1.16	Is DBS check required on entry?	No		
1.17	Professional, Statutory or Regulatory Body (PSRB) accreditation	The engineering programmes have been developed in line with PSRB requirements, including IMechE, IET, and RAeS. MSc Engineering (Sustainable Energy) *IET *Subject to accreditation 2027 IET - https://www.theiet.org This information is correct at the time of validation, please refer to the PSRB register for current accreditation status.		
1.18	Welsh Medium Provision	The programmes will be delivered through the medium of English. Students have the option to submit assessments in the medium of Welsh. To support Welsh Medium development, the programme includes a 20-credit Welsh for STEM module available as a short course for all engineering students.		
1.19	External reference points	QAA Subject Benchmark Statement Engineering (2023) QAA Characteristics Statements Higher Education Credit Framework CQFW PSRB Accreditation Guidelines		
1.20	Derogation to Academic Regulations	Regulation Clause(s) affected	Derogation Summary	
		TPG-D2 and D3	- The minimum mark for each module is 50%. - Each element of assessment (where there is more than one assessment) requires a minimum mark of 10% below the pass mark (40% for Level 7).	
		TPG-E10.4, TPG-E5.4	No compensation allowed due to the requirement for all AHEP learning outcomes to be met.	
1.21	Foundation Year route	No		

Section 1 – Regulatory Details

1.22	Placement / Work based learning	N/A
1.23	Length and level of the placement	N/A
1.24	Collaborative arrangement	N/A

Section 2 – Programme Details

2.1 Aims of The Programme

The MSc Engineering (Sustainable Energy) is designed to prepare graduates and professionals to lead in the development and implementation of low-carbon, efficient, and integrated energy systems. The programme blends advanced technical knowledge with practical application, equipping learners to address real-world challenges in renewable energy, sustainability, and systems innovation.

2.2 Programme Structure and Diagram, Including Delivery Schedule

Full-Time Delivery – September intake (12 months)

The full-time route is structured for intensive study over one academic year. In Semester 1, students undertake Research Methods and Postgraduate Studies, Engineering Design and Innovation, and Energy Systems Modelling and Simulation—developing a robust foundation in technical analysis and research-led innovation within energy engineering.

In Semester 2, learners focus on applied and specialist content through modules including Advanced Power Systems and Renewable Integration, Low Carbon Technology and Storage Integration, and Energy Reduction and Sustainability. These modules address current industry trends and future challenges, preparing students for roles in energy systems design, sustainable development, and policy implementation. The programme culminates in a Dissertation undertaken across Semesters 1 to 3, enabling students to explore a sustainability-focused topic aligned to their career goals or sector-specific needs.

Full-Time Delivery - January intake (18 months)

This full-time route is designed for those undertaking intensive study, spread over 18 months. In their first Semester, students' complete application-focused modules including Advanced Power Systems and Renewable Integration, Low Carbon Technology and Storage Integration, and Energy Reduction and Sustainability. In their second semester (which is Semester 1 in the next academic year) students will study, Research Methods and Postgraduate Studies, Engineering Design and Innovation, and Energy Systems Modelling and Simulation, developing analytical and design skills for

Throughout their second and third semester, students will complete a substantial Dissertation project, allowing students to conduct an in-depth research or industry-aligned project.

2.2 Programme Structure and Diagram, Including Delivery Schedule

Part-Time (Day Release) Delivery (2 Years)

The part-time route is designed for working professionals, delivered on a day-release basis to allow learners to apply knowledge directly within their organisations. In Year 1, students complete Engineering Design and Innovation, Energy Systems Modelling and Simulation, Advanced Power Systems and Renewable Integration, and Low Carbon Technology and Storage Integration, grounding them in the technologies and strategies shaping the future of sustainable energy.

In Year 2, the focus shifts to academic development with Research Methods and Postgraduate Studies and Energy Reduction and Sustainability, followed by the year-long Dissertation, where learners can investigate a work-based or research-informed energy problem—generating practical, impactful solutions for real energy challenges.

Full-time Programme Structure – September intake

Level	Module Code	Module Title	Credit Value	Core/Option	Semester of delivery
L7	ENG7A3	Research Methods and Postgraduate Studies	20	Core	1
L7	ENG7A4	Engineering Design and Innovation	20	Core	1
L7	ENG7A7	Energy Systems Modelling and Simulation	20	Core	1
L7	ENG7A9	Advanced Power Systems and Renewable Integration	20	Core	2
L7	ENG7B3	Low Carbon Technology and Storage Integration	20	Core	2
L7	ENG7B4	Energy Reduction and Sustainability	20	Core	2
L7	ENG7B6	Dissertation	60	Core	1 - 3

Full-time Programme Structure – January intake

Level	Module Code	Module Title	Credit Value	Core/Option	Semester of delivery	Year of Study
L7	ENG7A9	Advanced Power Systems and Renewable Integration	20	Core	2	Yr.1
L7	ENG7B3	Low Carbon Technology and Storage Integration	20	Core	2	Yr.1
L7	ENG7B4	Energy Reduction and Sustainability	20	Core	2	Yr.1
L7	ENG7A3	Research Methods and Postgraduate Studies	20	Core	1	Yr.2
L7	ENG7A4	Engineering Design and Innovation	20	Core	1	Yr.2
L7	ENG7A7	Energy Systems Modelling and Simulation	20	Core	1	Yr.2
L7	ENG7B6	Dissertation	60	Core	1-2	Yr.2

Part-time Programme Structure						
Level	Module Code	Module Title	Credit Value	Core/Option	Semester of delivery	Year of Study
L7	ENG7A4	Engineering Design and Innovation	20	Core	1	Yr.1
L7	ENG7A7	Energy Systems Modelling and Simulation	20	Core	1	Yr.1
L7	ENG7A9	Advanced Power Systems and Renewable Integration	20	Core	2	Yr.1
L7	ENG7B4	Energy Reduction and Sustainability	20	Core	2	Yr.1
L7	ENG7A3	Research Methods and Postgraduate Studies	20	Core	1	Yr.2
L7	ENG7B3	Low Carbon Technology and Storage Integration	20	Core	2	Yr.2
L7	ENG7B6	Dissertation	60	Core	1 - 3	Yr.2

2.3 Programme Learning Outcomes

The following programme learning outcomes have been fully mapped against the AHEP-4 learning outcomes for Partial CEng with further learning accreditation. M6, M8-M15 Learning outcomes achieved at previous level of study.

No.	Learning Outcome	K	I	S	P	PG Cert (L7)	PG Dip (L7)	Masters (L7)	Optional Ref (PSRB standards)
1	Apply a comprehensive knowledge of mathematics, statistics, natural science and engineering principles to the solution of complex problems. Much of the knowledge will be at the forefront of the particular subject of study and informed by a critical awareness of new developments and the wider context of engineering	☒	☐	☐	☐	☒	☒	☒	M1
2	Formulate and analyse complex problems to reach substantiated conclusions. This will involve evaluating available data using first principles of mathematics, statistics, natural science and engineering principles, and using engineering judgment to work with information that may be uncertain or incomplete, discussing the limitations of the techniques employed	☒	☐	☐	☐	☒	☒	☒	M2
3	Select and apply appropriate computational and analytical techniques to model complex problems, discussing the limitations of the techniques employed	☐	☐	☒	☐	☒	☒	☒	M3
4	Select and critically evaluate technical literature and other sources of information to solve complex problems	☐	☐	☒	☐	☒	☒	☒	M4
5	Design solutions for complex problems that evidence some originality and meet a combination of societal, user, business and customer needs as appropriate. This will involve consideration of applicable health and safety, diversity, inclusion, cultural, societal, environmental and commercial matters, codes of practice and industry standards	☐	☒	☐	☐	☒	☒	☒	M5

No.	Learning Outcome	K	I	S	P	PG Cert (L7)	PG Dip (L7)	Masters (L7)	Optional Ref (PSRB standards)
6	Evaluate the environmental and societal impact of solutions to complex problems (to include the entire life-cycle of a product or process) and minimise adverse impacts	☐	☒	☐	☐	☒	☒	☒	M7
7	Function effectively as an individual, and as a member or leader of a team. Evaluate effectiveness of own and team performance	☐	☐	☐	☒	☒	☒	☒	M16
8	Communicate effectively on complex engineering matters with technical and non-technical audiences, evaluating the effectiveness of the methods used	☐	☐	☐	☒	☐	☒	☒	M17
9	Plan, conduct and report on an original programme of work (Dissertation)	☒	☒	☒	☒	☐	☐	☒	-

Note: K- Knowledge and understanding; I-Intellectual Skills; S-Subject Skills; P-Practical, professional and employability skills

2.4 Learning and Teaching Strategy

Key to this provision is the opportunity to work on authentic assessments that replicate as best as possible real world engineering careers. Formal examinations have been removed and replaced where possible with coursework, projects or portfolio. Inbuilt into the assessment strategies are timed assessment that may include software-based assessment, practical evaluation or viva style assessments. Assessments are designed to be innovative and inclusive and will evolve as technology develops.

The learning and teaching strategy aligns with Wrexham University's Active Learning Framework (ALF) incorporating key employability skills. It is flexible, engaging, and responsive to student diversity and professional demands. A blended approach combines on-campus sessions with virtual study activities.

Face-to-Face Learning

Students will engage in lectures, seminars, and workshops in various settings, incorporating case studies and problem-based learning. The programme is mapped to instructional models that increase laboratory-based learning, critical for reinforcing theoretical knowledge through practical application:

Model A: 100% Classroom

Model B: 50% Classroom / 50% Laboratory

Model C: 25% Classroom / 75% Laboratory

Model D: 100% Laboratory

These models promote deeper learning, research capability, and technical proficiency. Laboratory hours have been increased to allow students to apply classroom-acquired theory, reinforcing understanding and preparing them for future innovation in industry or postgraduate research.

Virtual Learning

Delivered through the VLE and Microsoft Teams, virtual learning includes asynchronous tasks (videos, quizzes, readings, virtual visits) and synchronous activities (discussions, case studies, simulations). Sessions will be recorded where appropriate.

Tutorials

Delivered both in person and online, tutorials promote active participation through individual and group engagement. They are designed to encourage critical thinking, reflective practice, and student-led learning, supporting creativity, independence, and a deeper understanding of subject knowledge and professional practice.

2.5 Assessment Strategy

The assessment strategies are designed to be supportive and to build confidence, whilst also ensuring that students engage with core material, develop the fundamental and subject skills required for progression of undergraduate studies, and reward and incentivise students.

Assessment tasks are varied to facilitate students to evidence their learning and include portfolio, presentations, practical and oral assessment which promote authentic assessment and encourage the deeper learning that is a key feature of higher education. Formative feedback opportunities are embedded into each of the modules regularly and encourages students to reflect on their progress.

2.5 Assessment Strategy

Feedback is provided within 15 working days of the assessment submission date and may be delivered individually or in groups, in written, verbal, or recorded formats. This ensures that students receive timely, constructive, and developmental guidance to support continuous learning and improvement.

Disclaimer

Throughout quality assurance processes we have ensured that this programme engages with and is aligned to:
